

| | |
|----------------|---------------------------------------|
| Project | Nanoarchitectronics |
| Call | H2020-FET-Open 02-2016 |
| Type of Action | CSA - Coordination and Support Action |
| Acronym | NTX |
| Number | 737135 |
| Duration | 24 months |
| Start Date | 01 Jan 2017 |

| WP name | Deliverable | Deliverable Name | Responsible |
|-------------|-------------|-------------------------|-------------|
| WP1 – CON.1 | D1.1 | Report on EXEMI Concept | ESPCI |

| Written by | Other Contributors | Institutions involved in the WP | Version |
|--|---|---|---------|
| C.TRIPON-CANSELIET (ESPCI) R. CARMINATI (ESPCI) Y.de WILDE (ESPCI) | J CHAZELAS (THALES) L. PIERANTONI (UNIPM) S. MACI (UNISI) | UNISI, MVI, THALES, ICN2, VTT, KCL, ESPCI , POLITO, UNIVPM | V9 |

| | |
|--|-----------|
| 1. Introduction..... | 1 |
| 2. Action #1: Insertion of quantum effects in EM systems..... | 3 |
| 2.1. Engineering the dynamics of single photon sources | 3 |
| 2.1.1. Concepts for LDOS engineering..... | 3 |
| 2.1.2. Characterization techniques of LDOS in real systems | 3 |
| 2.2. Coupling quantum sources through surface plasmons | 4 |
| 2.2.1. Long-range fluorescence energy transfer through surface plasmons | 4 |
| 2.3. Control of quantum coherence and collective effects | 5 |
| 2.3.1. CDOS and engineering rules for quantum coherence | 5 |
| 2.3.2. Superradiant sources in quantum well structures | 6 |
| 3. Action #2: Bringing established EM concepts and architectures at nanoscale level | 6 |
| 3.1. Design of antennas in optical domain..... | 6 |
| 3.1.1. Optical metallic antennas based on nanoparticles and DNA architectures | 6 |
| 3.1.2. Optical semiconducting antennas | 7 |
| 3.1.3. Optical patch antennas | 8 |
| 3.2. Characterization of optical antennas: From visible down to mm-waves..... | 9 |
| 3.2.1. Standard SNOM and near-field fluorescent probes | 9 |
| 3.2.2. Measurement of electric and magnetic LDOS at the nanoscale in the visible region. | 10 |
| 3.2.3. Infrared SNOM and TRSTM | 11 |
| 3.3. Superconductor Quantum Interference Filters | 12 |
| 3.4. Transmission / Reception ICs for Telecommunications and Radar..... | 13 |

| | | |
|--------|---|----|
| 3.5. | Microwave metasurfaces devices with optical interaction | 15 |
| 3.6. | CNT-based analogue circuits | 20 |
| 3.6.1. | CNT-based transistors | 21 |
| 3.6.2. | CNT-based filters and varactors | 23 |
| 3.6.3. | CNT-based switching..... | 23 |
| 3.6.4. | CNT-based interconnects | 25 |
| 3.6.5. | MWCNT bundles-based microwave antennas | 26 |
| 3.7. | 2D materials based circuits | 28 |
| 3.8. | Designing nanostructured transmission lines and BFN (Beam Forming Networks) | 29 |
| 4. | Action #3: Control/reconfigure NTX-based EM systems by nanoscale EM interactions .. | 30 |
| 4.1. | Optical reconfiguration: Light absorption in semiconducting materials | 31 |
| 4.2. | Electrical reconfiguration: Refractive index tuning of classical materials..... | 34 |
| 4.2.1. | Graphene hybrid interfaces | 35 |
| 4.2.2. | Strontium Titanate SrTiO ₃ | 36 |
| 4.2.3. | VO ₂ | 36 |
| 4.2.4. | Liquid crystals polymers | 36 |
| 4.2.5. | Superconducting materials..... | 37 |
| 4.2.6. | Microelectromechanical systems MEMS..... | 37 |
| 4.2.7. | Phase change materials..... | 37 |
| 5. | Impact | 40 |
| 5.1. | General Context | 40 |

| | | |
|-----------------|--|-----------|
| 5.2. | Global impacts on European Scientific Excellence | 40 |
| 5.3. | Impact on interdisciplinary knowledge..... | 41 |
| 5.4. | Impacts for European Society and Industry | 41 |
| 5.4.1. | NTX/EXEMI impact analysis in Gartner Hype-cycle | 41 |
| 5.4.2. | Smart Dust example..... | 42 |
| 5.4.3. | Potential applications of NTX/EXEMI in the field of ICT..... | 43 |
| 5.4.3.1. | Internet of Things (IoT) and Internet of Everything..... | 43 |
| 5.4.3.2. | Wearable electronics..... | 45 |
| 5.4.3.3. | Smart buildings and smart facades | 46 |
| 5.4.3.4. | Autonomous interconnected vehicles | 48 |
| 5.4.3.5. | Detect and Avoid for Unmanned aircraft systems | 49 |
| 5.4.3.6. | Sixth Generation (6G) telecommunications..... | 50 |
| 6. | European Excellence Laboratories..... | 52 |
| 7. | International (outside Europe) Excellence Laboratories | 57 |
| 8. | Excellence Laboratories - Most represented topics in NTX Consortium | 60 |
